

Auditing

Every exploration and mining company will at some stage need to 'take stock' of their current situation. An impartial and independent third party is often required to undertake this role and provide an honest professional opinion of a project.

Auditing can be conducted as part of an internal review of an exploration programme's effectiveness or as a full evaluation of a company's exploration property portfolio for Alternative Investment Market (AIM), Toronto Stock Exchange (TSX) or Johannesburg Stock Exchange (JSE) listing, or funding applications from financial institutes and private investors.

SRK ES offers:

Experience in assessing, auditing and evaluating exploration programmes at all stages of development. Much of this work is conducted as part of stock exchange documentation, due diligence studies, project audits or for internal review purposes. SRK ES often completes independent reviews of exploration plans, budgets and geological models as well as gap analyses to identify potential fatal flaws.

Knowledge of the documentary requirements for various stock exchange submissions, announcements and releases. SRK ES are able to guide projects and produce independent technical reports (ITRs) competent persons' reports (CPRs), portfolio assessments, annual reviews and evaluation of licence agreements.

Expertise in the assessment of exploration methods and their compliance with international best practices and reporting codes such as those produced by JORC, CIM and SAMREC. SRK ES can bring wide-ranging expertise to a project to identify, design and implement the most appropriate field procedures, sample preparation and handling protocols, comprehensive database management and laboratory analysis.

SRK ES maintains a team of staff who are members in good standing of various professional institutions such as the Institute of Materials Minerals and Mining (IMMM), the Australasian Institute of Mining and Metallurgy (AusIMM), the Geological Society of London and the Society of Economic Geologists. By virtue of this association and specific personal experience, many senior staff are recognised as Competent Persons (CP) and Qualified Persons (QP).

SRK ES and the wider SRK Group are well respected by banks and other institutions who have a role in financing exploration and mining projects. SRK ES' familiarity with their requirements including the timing and presentation of the release of exploration results puts any project at a clear advantage.
